Hi Jamie,

I've tried calling a few times and left a message once because I haven't been able to get a good data signal as I am in a remote part of New Hampshire. I apologize for not responding to the May email. Truthfully, I didn't see the email.

We have completed the Udyllite clean out and have the material in drums with lids on skids and designated for use in the machine in the near future. This project was completed within the timeline that was allowed in the CAFO. Do I send it to your attention? if so, what type of wording would you like to see?

The pump is in the Jessup sump and has been in place since before the completion date listed in the CAFO. I thought I mentioned this when we had the conversation about an extension for F008 storage that came out of the Jessup pit but maybe I'm mistaken.

I've had Terri send me pictures that are on my computer and am now able to download them and send them. They consist of the sump and pump on Jessup, the Udyllite tank that has been cleaned out and the working material that we removed which is in drums, skidded and identified.

I will continue to try calling to touch base with you and please call me if this happens again.

Sincerely,  
Marc Muzzarelli

Hi Marc,

I'm following up on my May email below. Please let me know if these items have been addressed and finalized and then provide the final documentation.

Thank you for your time and please feel free to call with any questions,

Jamie

Hi Marc,

I just wanted to follow-up on the final portion of the CAFO, paragraphs 50 - 56. I don't recall getting any information regarding the Utilite Machine. So I wanted to make sure that a waste determination had been made on the material in the Utilite Machine and that it had been removed accordingly.

Also I don't recall getting information ensuring that the pump on the Jessup Line was installed and working properly, paragraph 50.

Feel free to call with any questions and feel free to email me any of the final documents regarding the pump and the Utilite machine material.

Thanks for your help,

Jamie

Hi Jamie,  
I thought I attached this manifest with my last email but after review, I saw that I hadn't. This manifest includes F008 waste that was removed from the Jessup containment.

Thank You,
